TELLAN SOFTWARE: Tellan Announces Internet Payment Software for the
Commercial Enterprise; The United States Postal Service and NetRadio
Early Adopters of WebAuthorize Enterprise Pack

October 07, 1998

Byline: Business Editors/Technology Writers
Dateline: NEW YORK
Time: 05:01 PT
Word Count: 465

Fall Internet World 98, Booth No. 147

NEW YORK--(BUSINESS WIRE)--Oct. 7, 1998--Tellan Software, a leader in electronic transaction solution software, today introduces Enterprise Packs for the new WebAuthorize product line.

With an intuitive interface, merchants can browse, edit and manage their payment transactions via the Windows- or browser-based client software. The product's backend server has been benchmarked to process a minimum of 720 transactions a minute over a leased line.

The Enterprise Pack provides a method for enterprises to consolidate multiple disparate electronic payment solutions into a centrally managed payment server. All credit card numbers are encrypted during transmission from client to server, as well as in the transaction database residing at the server.

"The WebAuthorize Enterprise Pack was designed as a flexible and robust product, affordable to small merchants, yet scaleable enough to accommodate the largest merchants," said Donald Neff, president and founder of Tellan.

"Imagine the effectiveness to an enterprise of having one single server to handle card payments for your Web store, sales department, customer support, voice response system and all its physical stores."

Transactions may be authorized on an individual basis in real time, or grouped together as a batch and authorized at once.

WebAuthorize handles all major credit, travel and entertainment, and other credit cards including purchase cards and private label cards. The software can also process debit cards and check guarantees (MICR and Driver's License).

Stored in batches, transactions may be reviewed, printed, exported, and manipulated with ease. WebAuthorize has been certified with all major bank networks in the U.S.

The United States Postal Service is using WebAuthorize for the Postal Service's Web store, "Post Office Online." Currently in a market test among 5,000 users, the site is expected to generate millions of postal transactions regularly. NetRadio also has implemented the software for their Web store.

WebAuthorize is also available in a Hosting Pack, designed for CSPs and ISPs. The product provides CSPs and ISPs with the ability to be a payment gateway through a recurring revenue stream for handling payment transactions for hosted merchants.

About Tellan Software, Inc.

Tellan Software manufactures and distributes a robust line of electronic payment solutions for Internet Commerce, business establishments using PCs as their electronic cash registers, mail order and home-based businesses, as well as global enterprises wishing to consolidate payment applications into a centralized payment platform.

Tellan Software is a privately held corporation with headquarters in San Jose, Calif. For more information, visit Tellan on the World Wide Web at: <http://www.tellan.com>.
